Re: Implementation of the Local Competition Provisions
Of the Telecommunications Act of 1996 (UNE Remand)
CC Docket No. 96-98

Dear Ms. Salas:

Pursuant to Section 1.1206 of the Commission's rules, the Competitive Telecommunications Association ("CompTel"), by its undersigned counsel, hereby gives notice of *ex parte* discussions its representatives had on September 3, 1999 with Jake Jennings, Claudia Fox and Chris Libertelli of the Common Carrier Bureau's Policy and Program Planning Division. Participating on behalf of CompTel for some or all of the discussions were: Russell Frisby, President of CompTel, Carol Ann Bischoff, Executive Vice President and General Counsel, CompTel, Joe Gillan of Gillan Associates, and the undersigned.

CompTel presented the Bureau with materials relating to the pricing of Centrex services by several ILECs. Specifically, CompTel presented the attached orders and tariffs from Pennsylvania, Colorado, Indiana, and Minnesota relating to the per-station line charges for the Centrex services of Bell Atlantic, US West and Ameritech. CompTel also presented staff with a summary of traffic exchange statistics collected from the RBOCs' responses to the Commission's Fourth Survey on Local Competition.

No. of Copies rec'd 0+1
List ABCDE

KELLEY DRYE & WARREN LLP

Ms. Magalie R. Salas
September 7, 1999
Page 2

In addition, CompTel also discussed recent extended link ("EEL") proposals made by the Association for Local Telecommunications Services ("ALTS") and by Bell Atlantic, et al. CompTel discussed the difficulties associated with any proposal that relies on the type of use to be made by the requesting carrier of the network element, and discussed the various configurations of loops and dedicated transport that could comprise an EEL. CompTel discussed options the Commission could use to order the EEL as a network element or as a combination of network elements.

In accordance with Section 1.1206(b), an original and one copy of this notice is being provided.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven A. Augustino". The signature is stylized with a large, sweeping initial "S" and a distinct "A" and "H" for the last name.

Steven A. Augustino

CENTREX SERVICE PRICING OPTIONS

A. PROVISIONS

1. GENERAL PROVISIONS

All of the provisions specified in Section 2 and Section 2A in this Informational Tariff apply to Centrex systems covered by the Pricing Option contract provisions in this Section.

The Price Predictability contracts in this Section apply only to the Centrex main station line monthly rate. The Sixty Month Price Stability contract in this Section applies to both the main station line and the common equipment monthly rate.

Beginning June 1, 1996 this service is offered on a Grandfathered (limited availability) basis to Centrex systems up to 75 lines. These systems are not available for new installations of systems up to 75 lines. Customers utilizing these systems up to 75 lines may continue the service at their present locations and may add lines at their present locations. Customers will not be permitted to move their service to a new location or add locations. Customers under contract can retain service until the contract term expires. Upon contract expiration, customer may continue service on a month-to-month billing basis or convert to a new service.

2. AVAILABILITY

On or after August 23, 1987 the Pricing Option contract provisions in this Section are available as follows:

- a. To all existing and new Centrex Systems.
- b. To systems with Centrex service at Hospitals and Medical Institutions. Customers with Centrex Service at Hospital and Medical Institutions that subscribe to the Pricing Option contract provisions must include all of their patient Centrex lines under a Pricing Option for which the rates and provisions in this Section apply, in place of the rates and provisions shown in Section 2, Paragraph C.3. (C)
- c. To Centrex systems covered by Section 2A provided and at such time as they convert their entire Centrex system to the appropriate provisions and rates shown in this Section. However, Educational/Medical Institutions, covered by Section 2A, that sign a Pricing Option contract may convert their residence rated student/patient Centrex lines to regular Centrex lines. This conversion must occur within ten months of the Pricing Option contract effective date or at the same time as the student line bulk disconnect/reconnect and conversion to regular Centrex lines.

CENTREX SERVICE PRICING OPTIONS

A. PROVISIONS (Cont'd)

2. AVAILABILITY (Cont'd)

Customers that have signed Pricing Option contracts that are in Sections 2B and 2C have the option to convert to a Pricing Option in this Section. The contract effective date of the customer's Original Pricing Option contract will apply to the new contract period. After converting to a Pricing Option in this Section, customers may not convert back to plans in Sections 2B or 2C.

The customer must signify in writing on Pricing Option contract forms provided by the Telephone Company the acceptance of the provisions and rates of the Pricing Option contract provision selected.

CENTREX SERVICE PRICING OPTIONS

A. PROVISIONS (Cont'd)

2. AVAILABILITY (Cont'd)

A customer who establishes a Pricing Option contract is covered by the provisions and rates of this Section until such time as the contract expires or the conditions surrounding cancellation by the customer have been met.

B. TERMS AND CONDITIONS

1. GENERAL

Rate stability provisions as specified in Section 2 in this Informational Tariff for Centrex main station lines and provisions and rates for the optional Sixty Month contract, both of which expire December 4, 1987, are automatically superseded for customers agreeing to the provisions and rates of the Pricing Options in this Section. However, their termination liability provisions still apply until the expiration date of the optional Sixty Month contract if this amount is greater than the Pricing Option contract liabilities applicable in this Section.

2. LINE COST CHARGES

Rates specified for Centrex main station lines in Paragraphs C.1. and C.2. following include the amount of the applicable Centrex Line Cost Charge as specified in The Bell Atlantic Telephone Companies' Tariff F.C.C. No. 1.

3. OPTIONAL FEATURES

All present and future features in Section 2, Paragraph D in this Informational Tariff, will be available to Centrex systems where facilities permit at the applicable rates.

4. PRICING OPTION CONTRACT PERIODS AND RATE COMPONENTS

The two Pricing Options available are Four through Ten Year Price Predictability contracts as specified in Paragraph 4.a. following and a Sixty Month Price Stability contract as specified in Paragraph 4.b. following.

a. Provision I: Four Through Ten Year Price Predictability

A customer may select a four-, five-, six-, seven-, eight-, nine- or ten-year contract period which applies to all lines associated with each Centrex system. The Price Predictability main station line rate consists of three required components.

CENTREX SERVICE PRICING OPTIONS

B. TERMS AND CONDITIONS (Cont'd)

4. PRICING OPTION CONTRACT PERIODS AND RATE COMPONENTS (Cont'd)

a. Provision I: Four Through Ten Year Price Predictability (Cont'd)

- (1) Component A represents the capital investment of the Centrex line rate. Component A will not increase over the life of the contract for the main station lines in service on the contract effective date as well as additional lines installed prior to the effective date of a rate increase in Component A. Lines installed after an increase in Component A has become effective will be added at the new Component A rate for their existing contract length.
- (2) Component B represents the expense portion of the Centrex line rate. The applicable rate for Component B may vary during a customer's contract no more than once per year. Furthermore, the Telephone Company agrees not to initiate any rate increase in Component B in excess of the cumulative annual increase in the Consumer Price Index for All Urban Consumers (CPIU), as published by the U.S. Department of Labor Bureau of Labor Statistics, while these Pricing Options are in effect.
- (3) Component C represents the Exchange Access portion of the Centrex line rate. Component C is subject to change and subject to federal excise tax.

b. Provision II: Sixty Month Price Stability

The Telephone Company agrees not to initiate any increases in monthly rates for a period of sixty months. This includes the main station line and common equipment.

The charges for Price Predictability and Price Stability contracts for Basic Centrex Systems are shown in Paragraph C.1 and for Grandfathered Centrex Systems in Paragraph C.2 of this Informational Tariff.

5. CONTRACT EFFECTIVE MARCH 2, 1995. DATE AND EXPIRATION DATE

For all existing Centrex systems, the contract effective date is the date the Telephone Company Pricing Option contract forms are signed by the customer indicating the acceptance of the Pricing Option terms and conditions. For new Centrex systems, the contract effective date is the completion date of the initial Centrex system's installation.

6. MINIMUM LINE REQUIREMENT

The customer agrees to pay for the number of Centrex main station lines in service. However, on a recurring basis, regardless of changes, the customer agrees to pay for no less than 85% of the largest quantity of lines that were in service thus far during the contract. The minimum line requirement will be reviewed the second workday in February of each year and updated accordingly.

CENTREX SERVICE PRICING OPTIONS

B. TERMS AND CONDITIONS (Cont'd)

7. ADDITIONS

Over the course of all Pricing Option contract periods, the customer may add main station lines over and above the quantity of main station lines in service on the effective date of the particular customer's original Pricing Option contract, as follows:

a. Provision I

Under the four-, five-, six-, seven-, eight-, nine-, and ten-year Price Predictability contract periods, customers may add lines at the original Component A rate for two years from the contract effective date. Beyond the second year of the contract, if an increase in Component A has become effective, lines must be added at the new contract rates for the customer's existing contract period. Current Components B and C rates will apply.

b. Provision II

Under the sixty (60) month Price Stability contract period, customers may add lines at the original contract monthly per line rate throughout the life of the contract.

The Product/Service charges specified in Sections 2 and 2A in this Informational Tariff as appropriate, also apply for the installation of each Centrex main station line and common equipment.

8. MOVES AND UPGRADES

- a. If a Centrex customer under a Pricing Option contract moves or upgrades service and retains the same or greater minimum line requirement, termination liability will not apply, as long as the customer signs and fulfills the terms of a new Pricing Option contract of the same or greater duration. However, the customer must still pay the non-recurring charges applicable to the installation of service. An example of an upgrade includes but is not limited to a customer's change in technology where facilities permit.
- b. All systems covered by a Pricing Option contract are subject to the terms and conditions of the Pricing Option termination liability as stated in this Section. No credit for previous service will apply.
- c. When an educational institution exercises the Bulk Partial Disconnect/Reconnect Charge Option as provided for in Section 2, the lines affected will be considered in service for purposes of the minimum line requirement.

CENTREX SERVICE PRICING OPTIONS

B. TERMS AND CONDITIONS (Cont'd)

8. MOVES AND UPGRADES (Cont'd)

b. (Cont'd)

The Pricing Option contract's termination liability is based on the following calculation:

Average number of lines over the life of the Pricing Option contract multiplied by the applicable Pricing Option contract rate multiplied by 10 percent multiplied by the remaining months of the contract. (C)

The Pricing Option rate to be applied in the above calculation is the under 100 rate for systems under 100 lines and the over 100 rate should be applied to all lines for systems over 100 lines.

Pricing Option termination liability also applies to common equipment based on the following formula:

Ten Percent of the rate in effect at the time the system is disconnected multiplied by the remaining months in the contract period.

- c. Attendant common equipment, attendant positions, Basic Private Line Terminations, Basic Senderized Private Line Terminations, Advanced Private Line Terminations and Digital Facility Terminations are furnished under individual three year contract periods. In the event that any of these items of equipment are disconnected within the contract period, the established charges apply for the unit(s) for the period the unit(s) was in service, plus termination liability. Fifty percent (50%) of the rate in effect at the time the respective unit(s) is disconnected is used to compute the termination charges due for the remainder of the contract period.

CENTREX SERVICE PRICING OPTIONS

B. TERMS AND CONDITIONS (Cont'd)

8. MOVES AND UPGRADES (Cont'd)

- d. In addition, any existing or new Centrex customer subscribing to any Pricing Option contract (Provisions I or II) is subject to the Pricing Option Termination Liability regardless of the number of Centrex lines in the system. As a result, all Pricing Option contract customers are subject to all terms and conditions of the Pricing Option termination liability including the termination charges as calculated in this Section.

9. CANCELLATION OF CONTRACT

Cancellation of a Pricing Option contract is effective upon receipt by the Telephone Company of written notification from the customer. The customer agrees to pay Pricing Option contract liability as specified in B.8. preceding as if its service had been disconnected on the effective date of such cancellation. The system then converts to the provisions specified in Sections 2 or 2A as appropriate, of this Informational Tariff.

10. RENEWAL OPTIONS AND REQUESTS FOR CHANGE IN CONTRACT PERIOD

- a. At any time during the customer's contract period, the customer may renew its present Pricing Option contract by entering into a new contract to take effect at the expiration of its current Pricing Option contract or rescind its present Pricing Option contract and select a Pricing Option contract of a greater duration without incurring Pricing Option termination liability charges. However, the minimum line requirement must remain the same or greater as the original contract for the subsequent contract. No credits or adjustments will be given for payments made to an existing or prior contract, nor will any Product/Service charges specified in Section 2 be reapplied for existing Centrex main station lines which remain in place. The customer must signify in writing on Pricing Option contract forms provided by the Telephone Company the acceptance of the new contract at the designated Pricing Option rates in effect.
- b. Customers that have signed Pricing Option contracts that are in Sections 2B and 2C have the option to convert to a Pricing Option in this Section. The contract effective date of the customer's original Pricing Option contract will apply to the new contract period. After converting to a Pricing Option in this Section customers may not convert back to plans in Sections 2B or 2C.

CENTREX SERVICE PRICING OPTIONS

B. TERMS AND CONDITIONS (Cont'd)

11. LIABILITY ON DISCONNECTS/CANCELLATIONS AFTER RENEWALS

- a. If the customer has fulfilled the original Pricing Option contract, the effective date and the rates of the new Pricing Option contract will be used to calculate the Pricing Option termination liability.
- b. If the customer has not fulfilled the original or subsequent Pricing Option contract, the effective date of the customer's original Pricing Option contract and the rates of the subsequent Pricing Option Contract will be used to calculate the Pricing Option termination liability as specified in B.8. preceding.
- c. If the customer has fulfilled the original and subsequent Pricing Option contracts, the Pricing Option termination liability will not apply. However, if the system remains in service, provisions and rates of Sections 2 or 2A, as appropriate, will apply. If the system is disconnected concurrently with the expiration date of the Pricing Option contract Pricing Option termination liability does not apply.

12. PREPAYMENT

At any time during their contract period, customers under Pricing Option contract Provision I in Paragraph 4.a. may prepay the entire Component A rate for the life of the contract. Should the customer decide to disconnect before the end of their contract period, no Pricing Option contract liability will apply for the lines, however, the prepaid amount will not be refunded.

If the customer wishes to add lines, they may be prepaid in groups of 20 (or more) or added monthly at current Provision I rates for the customer's existing contract period. Additional lines paid monthly will be subject to the Pricing Option termination liability stated in Paragraph B.8. Additional lines which are prepaid are not subject to termination liability, however, the prepaid amount will not be refunded.

The minimum line requirement specified in Paragraph B.6 applies to Components B and C for lines that have been prepaid and for Components A, B and C for additional lines paid monthly.

Termination liability as specified in Paragraph B.8 preceding applies to additional lines paid monthly and to other items of service. Components B and C for lines that have been prepaid are not subject to termination liability.

When a customer has prepaid Component A under a former payment plan and selects a new payment plan prior to completion of the prepaid plan period, the Telephone Company will determine the adjustment to the charges applicable under the new payment plan.
